

Future line of work

- Feasibility of nutrient management in enhancing crop health.
 - Monitoring pollution in Kuttanad ecosystem.
 - Identification of drought tolerant lines in rice.
 - Agrometeorology of mango.
 - Identification of phyllody tolerant lines in snake gourd and cow pea and development of phyllody tolerant F1 hybrids.
 - Identification, collection and characterization of under exploited fruit crops.
 - Evolve strategies for on farm mechanization suitable to below sea level farming.
-
